

Extend the Reach of 3D

Deliver exponential value from existing CAD and PLM investments with personalized 3D visualization software.

Welcome to the Netflix for CAD.

DO YOU WANT MORE FROM YOUR CAD & PLM INVESTMENTS?

The sheer size and sensitive nature of CAD data, the cost of 3D hardware and software, and the number of data formats and software systems have made it nearly impossible to use 3D product data beyond engineering.

Now, Vertex makes it possible to engage your customers, employees, suppliers, and partners with 3D data wherever they are on whatever devices they use.

We extend the reach of your 3D data to reduce supply chain bottlenecks, accelerate time-to-market, and increase sales.

IMPROVE DECISION MAKING AND EXECUTION

Make it easy for your customers, employees, and partners to share ideas with 3D data to drive more effective enterprise collaboration.

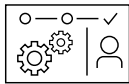

EXTEND THE REACH OF 3D Realize the full potential of your 3D CAD and PLM investment by enabling instant access to 3D data anywhere on any device.

SAVE TIME & MONEY Speed up 3D collaborative workflows and recover more than 80% of your time translating, formatting, sharing, and collecting design information. Reduce hardware and software costs by 50%.

UNLEASH THE FULL POTENTIAL OF YOUR 3D PRODUCT DATA

Sales & customer engagement

Customer installation testing and validation

Product design reviews

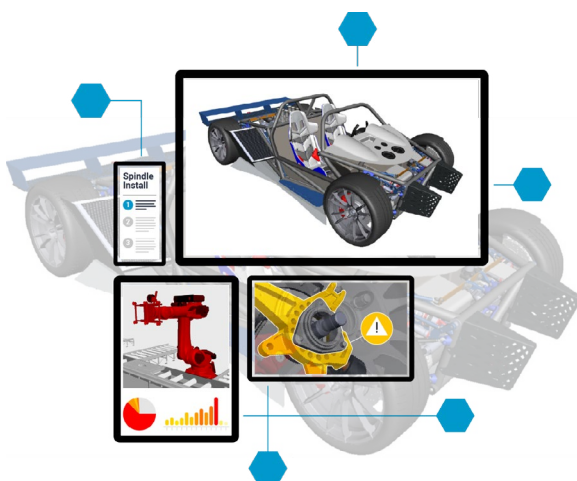

Factory digital work instructions and quality reporting

Service manuals and parts catalogs

Supplier RFQs

"It cuts down any problems, issues, or confusions in the initial purchasing with us taking ownership of the truck. Vertex helps us get exactly what we want when they deliver the truck."

- Terex Customer

"It has helped me sell more trucks. Vertex improves the quality of the sales process and improves the quality of the final product."

- Lucas Thompson, Territory Sales Manager, Terex

The Vertex Difference

No Files

We stream context-aware pixels, not part files, ensuring your IP is always under your control.

Combine Data with Ease

Merge data in seconds from more than 70 file formats and growing from multiple CAD, BIM, and PLM systems.

Zero Install

100% cloud-based 3D visualization, no software required.

Device Agnostic

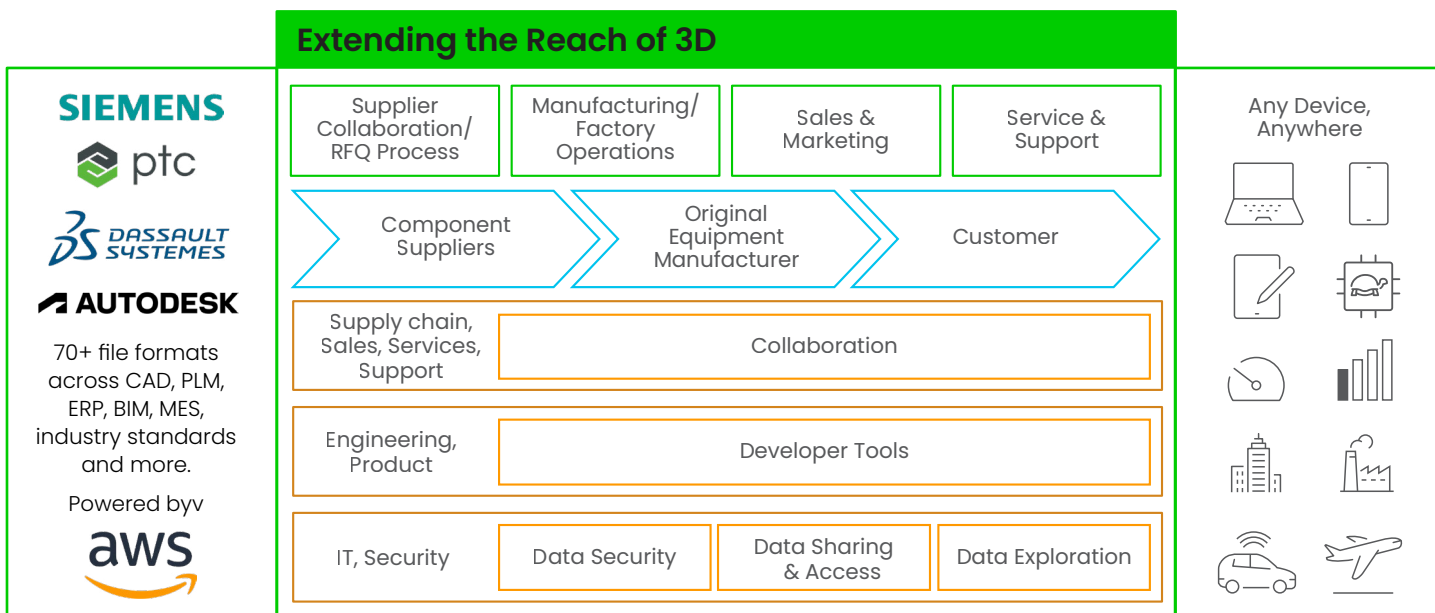

Ideal for mobile and low-power devices, on the road, in the air, or on the factory floor

Massive Models

Fully-interactive visualization of the largest 3D models, otherwise impossible to view on today's most powerful computers.

Quick Time-to-Value

Easily deploy 3D-powered solutions within days with turnkey cloud-deployed software and developer tools.

Vertex Software offers products based upon a revolutionary approach to 3D visualization of CAD data that performs 100% of the rendering in the cloud. We make 3D data sharing and collaboration on any device fast, easy, cost effective, and secure.

About us

At **Vertex Software**, we believe 3D visualization is the premier communication medium for the future of human innovation. We strive every day to accelerate global innovation, discovery, and idea exchange. Our solutions drive customer satisfaction, grow market share, engage suppliers and partners, and energize employees.
